Mesers. W. F. Jones & Bao, Philadelphia,
Gentlemen—I have thoroughly tested the Zinc Paint received from you some months since, and most cheerfully
testify to its good qualities. I have found it fully equal to
all you said of it. I had one pile-driving engine, which is
exposed to the weather, painted with it, winout any dryer
in it. When parily fit lahed, the work was suspended by
a severe shower of rain, which lasted two days, and on
resuming the painting after the storm, found the paint hard
and perfect. The engine and botler are perfectly protected
by it from the weather, and where most exposed to best,
steam and bot water, the paint is perfectly soond. I have
also tested it on wood and find it cheaper and better than
any other paint i have ever seen. We shall use it for paint
ing our sections in the spring if you can supply us. From
conversations on the subject with the foreman and painter
to the Navy Yard. I have no doubt but it will, after a fair
test, be used exclusively in the Navy Yards. I need only
wish you the success your paint deserves.
